

Marina Costa

Senior Software Engineer — Backend & Platform

São Paulo, Brazil · marina.costa@example.com · +55 11 91234-5678 · github.com/marinacosta · linkedin.com/in/marinacosta

SUMMARY

Backend engineer with eight years of experience building payment and compliance systems in Rust and TypeScript. I like owning systems end to end, from architecture to on-call.

EXPERIENCE

Ledgerly — Staff Software Engineer

Mar 2022 – Present

Remote · Full-time

- Built a multi-tenant organization layer that lets enterprise customers manage users, roles and API keys across 30+ subsidiaries.
- Designed a rules engine for Travel Rule compliance checks, reducing manual reviews by 55%.
- Integrated four payment providers (Stripe, Adyen, dLocal and PIX) behind a single settlement API.
- Owned architectural decisions for the event pipeline and led the migration from RabbitMQ to Kafka.

Tech: Rust, TypeScript, PostgreSQL, Kafka, Kubernetes, AWS

Banco Horizonte

São Paulo, Brazil

Software Engineer II

Jan 2020 – Apr 2022

- Maintained the card authorization service handling 2 million transactions per day with 99.99% availability.
- Built fraud detection features for PIX instant payments together with the risk team.
- Cut p99 latency of the ledger API from 800 ms to 120 ms by redesigning its PostgreSQL indexes.

Software Engineer

Jun 2018 – Dec 2019

- Developed internal Java and Spring Boot services for account onboarding and KYC checks.
- Wrote the Terraform modules used to provision the team's staging environments on AWS.

Nimbus Labs — Software Engineering Intern

Jan 2017 – Dec 2017

- Built internal dashboards in React and Python for the operations team.

PROJECTS

tinyqueue — open-source Rust job queue 2021 – Present

- Author and maintainer of a PostgreSQL-backed job queue library for Rust with 1,200 GitHub stars.

Budgetly — personal finance app 2019

- Built a React Native budgeting app backed by Supabase, used by 500 monthly active users.

EDUCATION

Universidade de São Paulo — B.Sc. in Computer Science 2014 – 2018

SKILLS

Languages: Rust, TypeScript, Go, Python, SQL, Elixir

Infrastructure: Kubernetes, Terraform, AWS, Docker

Data: PostgreSQL, Kafka, Redis

Frontend: React, Next.js

LANGUAGES

Portuguese (native), English (fluent), Spanish (intermediate)
